

INBRED CUCUMBER LINE 8D-5079
ABSTRACT OF THE DISCLOSURE

[0178] An inbred cucumber line, designated 8D-5079, is disclosed. The invention relates to the seeds of inbred cucumber line 8D-5079, to the plants of inbred cucumber line 8D-5079 and to methods for producing a cucumber plant, either inbred or hybrid, by crossing the inbred line 8D-5079 with itself or another cucumber line. The invention further relates to methods for producing a cucumber plant containing in its genetic material one or more transgenes and to the transgenic plants produced by that method and to methods for producing other inbred cucumber lines derived from the inbred 8D-5079.
